ACCELERATING **USER CENTRIC** DELIVERY

BRIAN ODHIAMBO

Google Developer Expert (Android)

Senior Android Engineer (Kotlin Multiplatform) @ Yassir

**“I have 150 project on
github. But how many users
are using on playstore?”**

Akili Mtu Wangu

- Engineering Structure
- Building with Users

VELOCITY & USER VALUE

**“speed without direction
leads to building features
users ignore”**

Akili Mtu Wangu

VELOCITY! VELOCITY! VELOCITY!

What?

The amount of work a development team can complete within a specific time frame, typically during a sprint or iteration.

VELOCITY! VELOCITY! VELOCITY!

What?

The amount of work a development team can complete within a specific time frame, typically during a sprint or iteration.

It is a key metric for tracking productivity and **forecasting project timelines**

VELOCITY! VELOCITY! VELOCITY!

What?

The amount of work a development team can complete within a specific time frame, typically during a sprint or iteration.

It is a key metric for tracking productivity and **forecasting project timelines**

Value?

- **Quick Time to Market**
- Reliable Forecasting
- **Quick & Fast Iterations**

EXPERIENCE! EXPERIENCE! EXPERIENCE!

What?

The tangible benefit a user
receives from our product.

EXPERIENCE! EXPERIENCE! EXPERIENCE!

What?

The tangible benefit a user
receives from our product.

It's all about how they feel when
they use the app.

EXPERIENCE! EXPERIENCE! EXPERIENCE!

What?

The tangible benefit a user receives from our product.

It's all about how they feel when they use the app.

It is a key metric for tracking adoption and **retention**

- **REVENUE**

**"If a feature doesn't
provide **clear**, **demonstrable**
value, it's just code debt
and UI clutter."**

Akili Mtu Wangu

CULTURE

2

CULTURE OR UNCULTURED

What?

The collection of shared values, habits, and principles that dictates how we build, how we interact, and ultimately, how successful we are.

It's the default behavior

CULTURE OR UNCULTURED

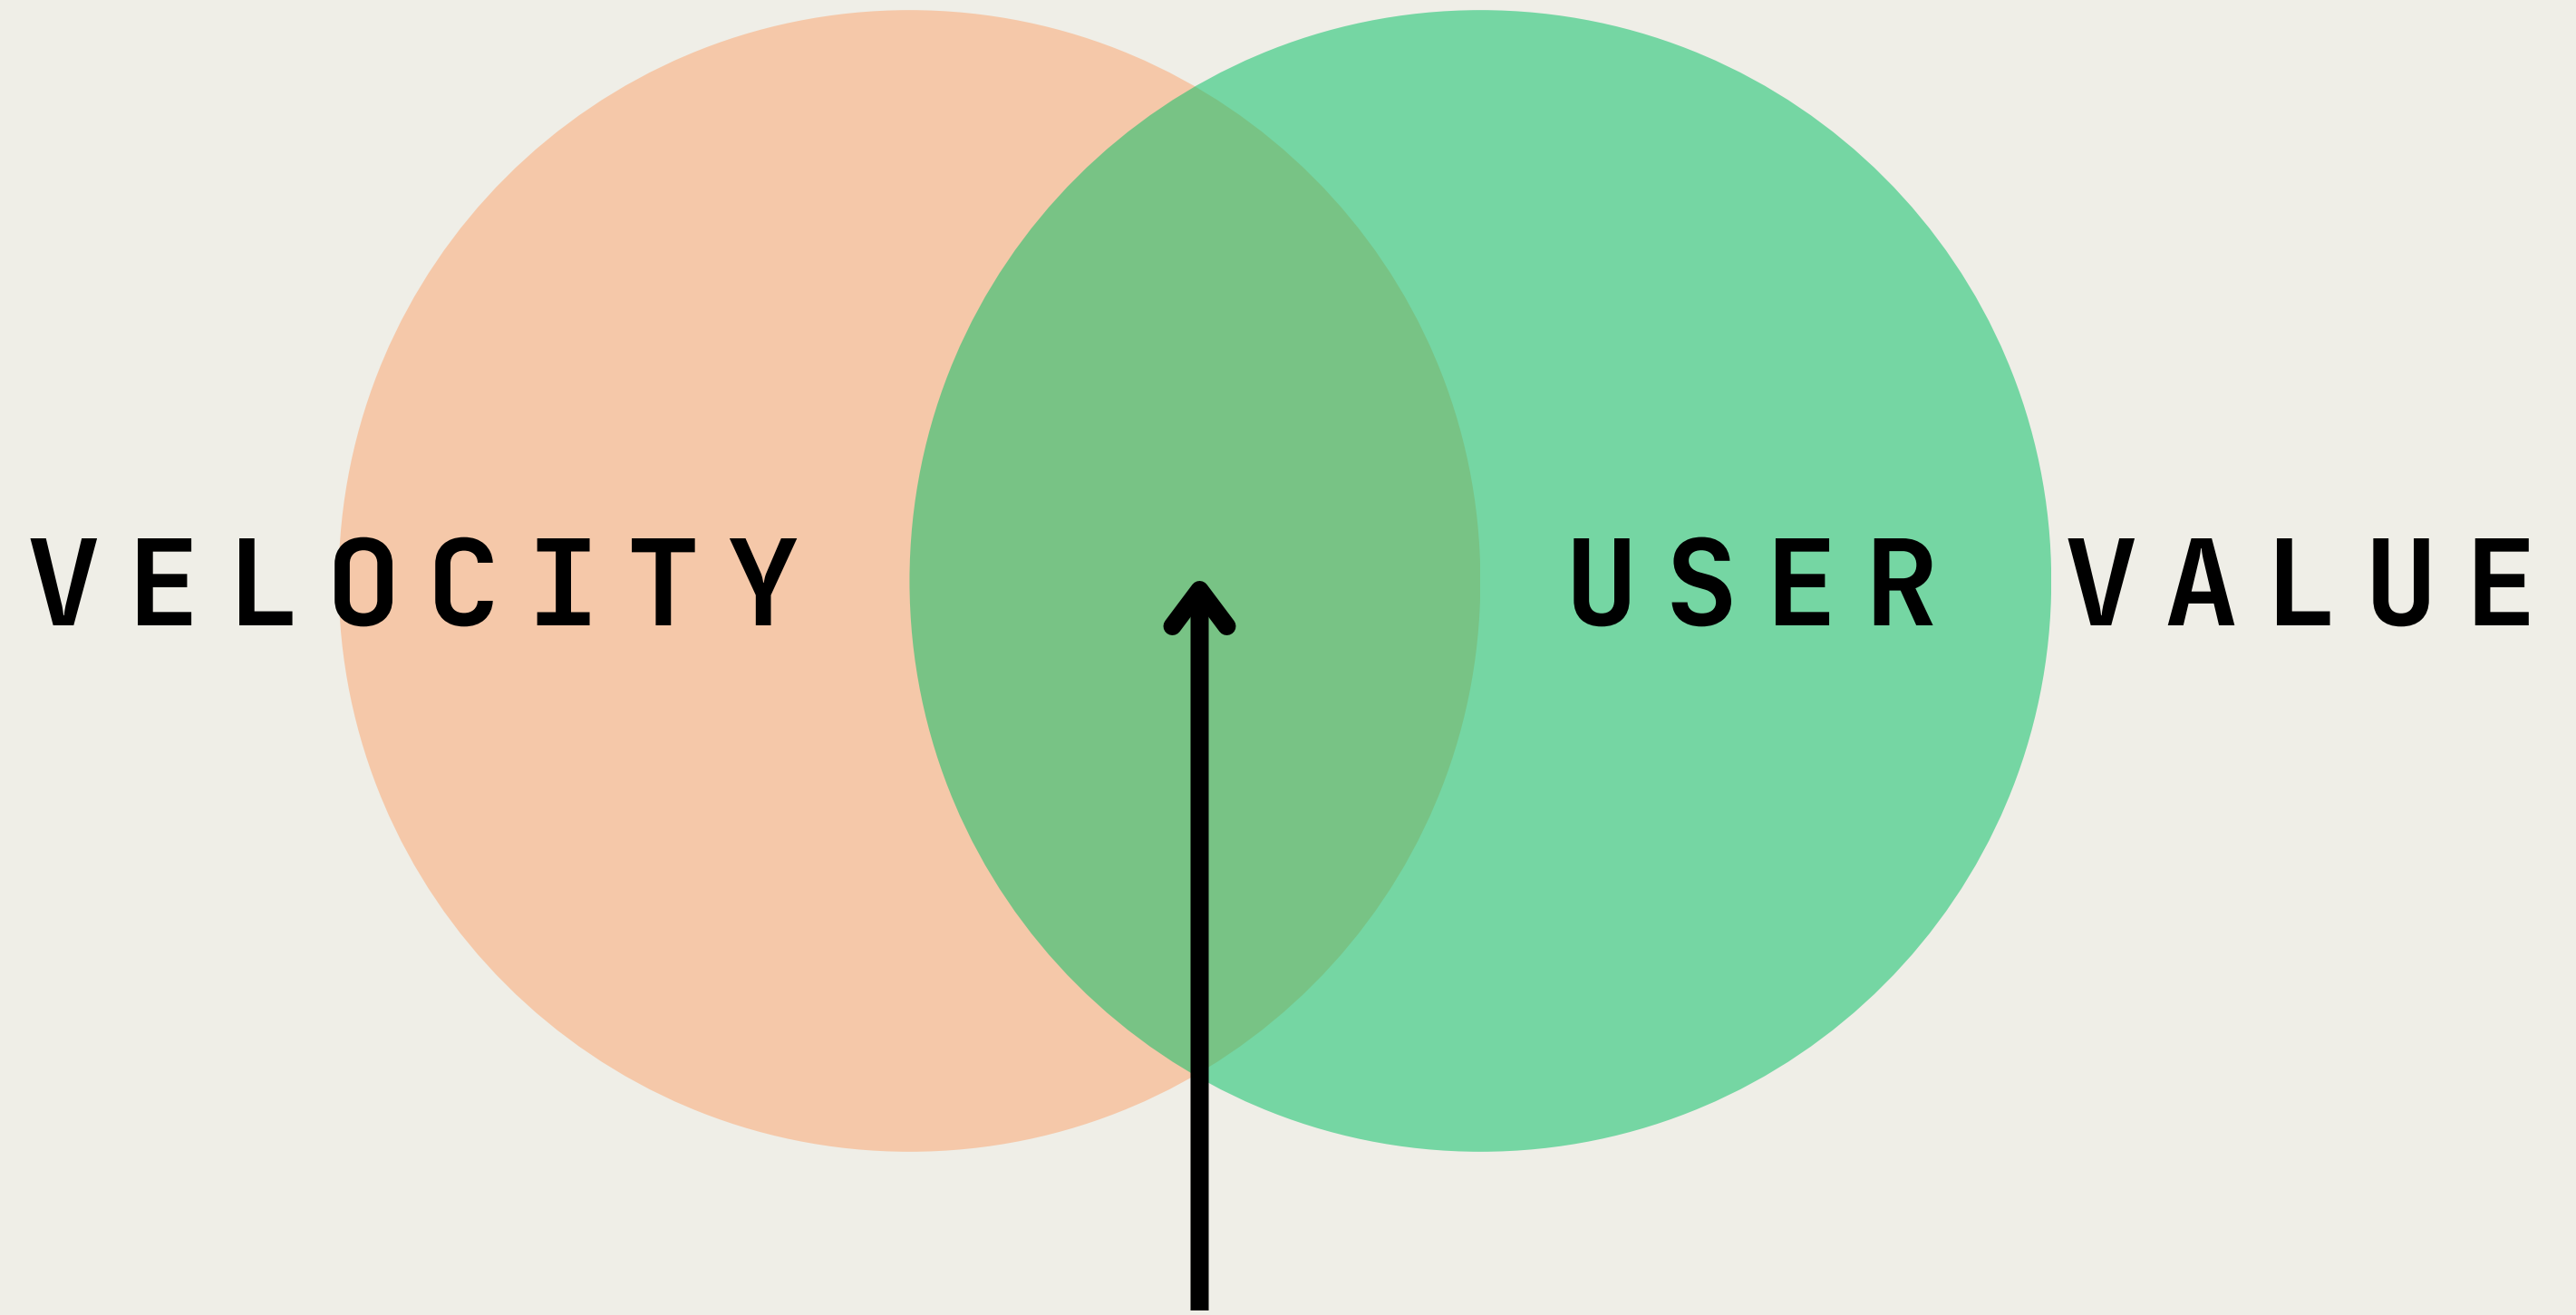

What?

The collection of shared values, habits, and principles that dictates how we build, how we interact, and ultimately, how successful we are.

It's the default behavior

Why?

- Do we ship it now, or do we fix that last bug?
- Do I ask for help and risk looking like I don't know?
- Do we blame the engineer, or do we blame the process that allowed it to happen?
- Is "good enough" acceptable, or do we strive for craftsmanship?

PRODUCT-DRIVEN & PRAGMATIC

What?

Engineering is tied to a meaningful “why” for the user.

Everything is **practical** and you can be able to **experiment** as much as possible.

PRODUCT-DRIVEN & PRAGMATIC

What?

Engineering is tied to a meaningful “why” for the user.

Everything is **practical** and you can be able to **experiment** as much as possible.

Experiment :

Try out new things, let it be an adventure

PRODUCT-DRIVEN & PRAGMATIC

What?

Engineering is tied to a meaningful “why” for the user. Everything is **practical** and you can be able to **experiment** as much as possible.

Experiment :

Try out new things, let it be an adventure

Why?

The primary focus is on **shipping user value**. Technical decisions are made in service of the product goals. A **balance** is struck between **speed and quality**.

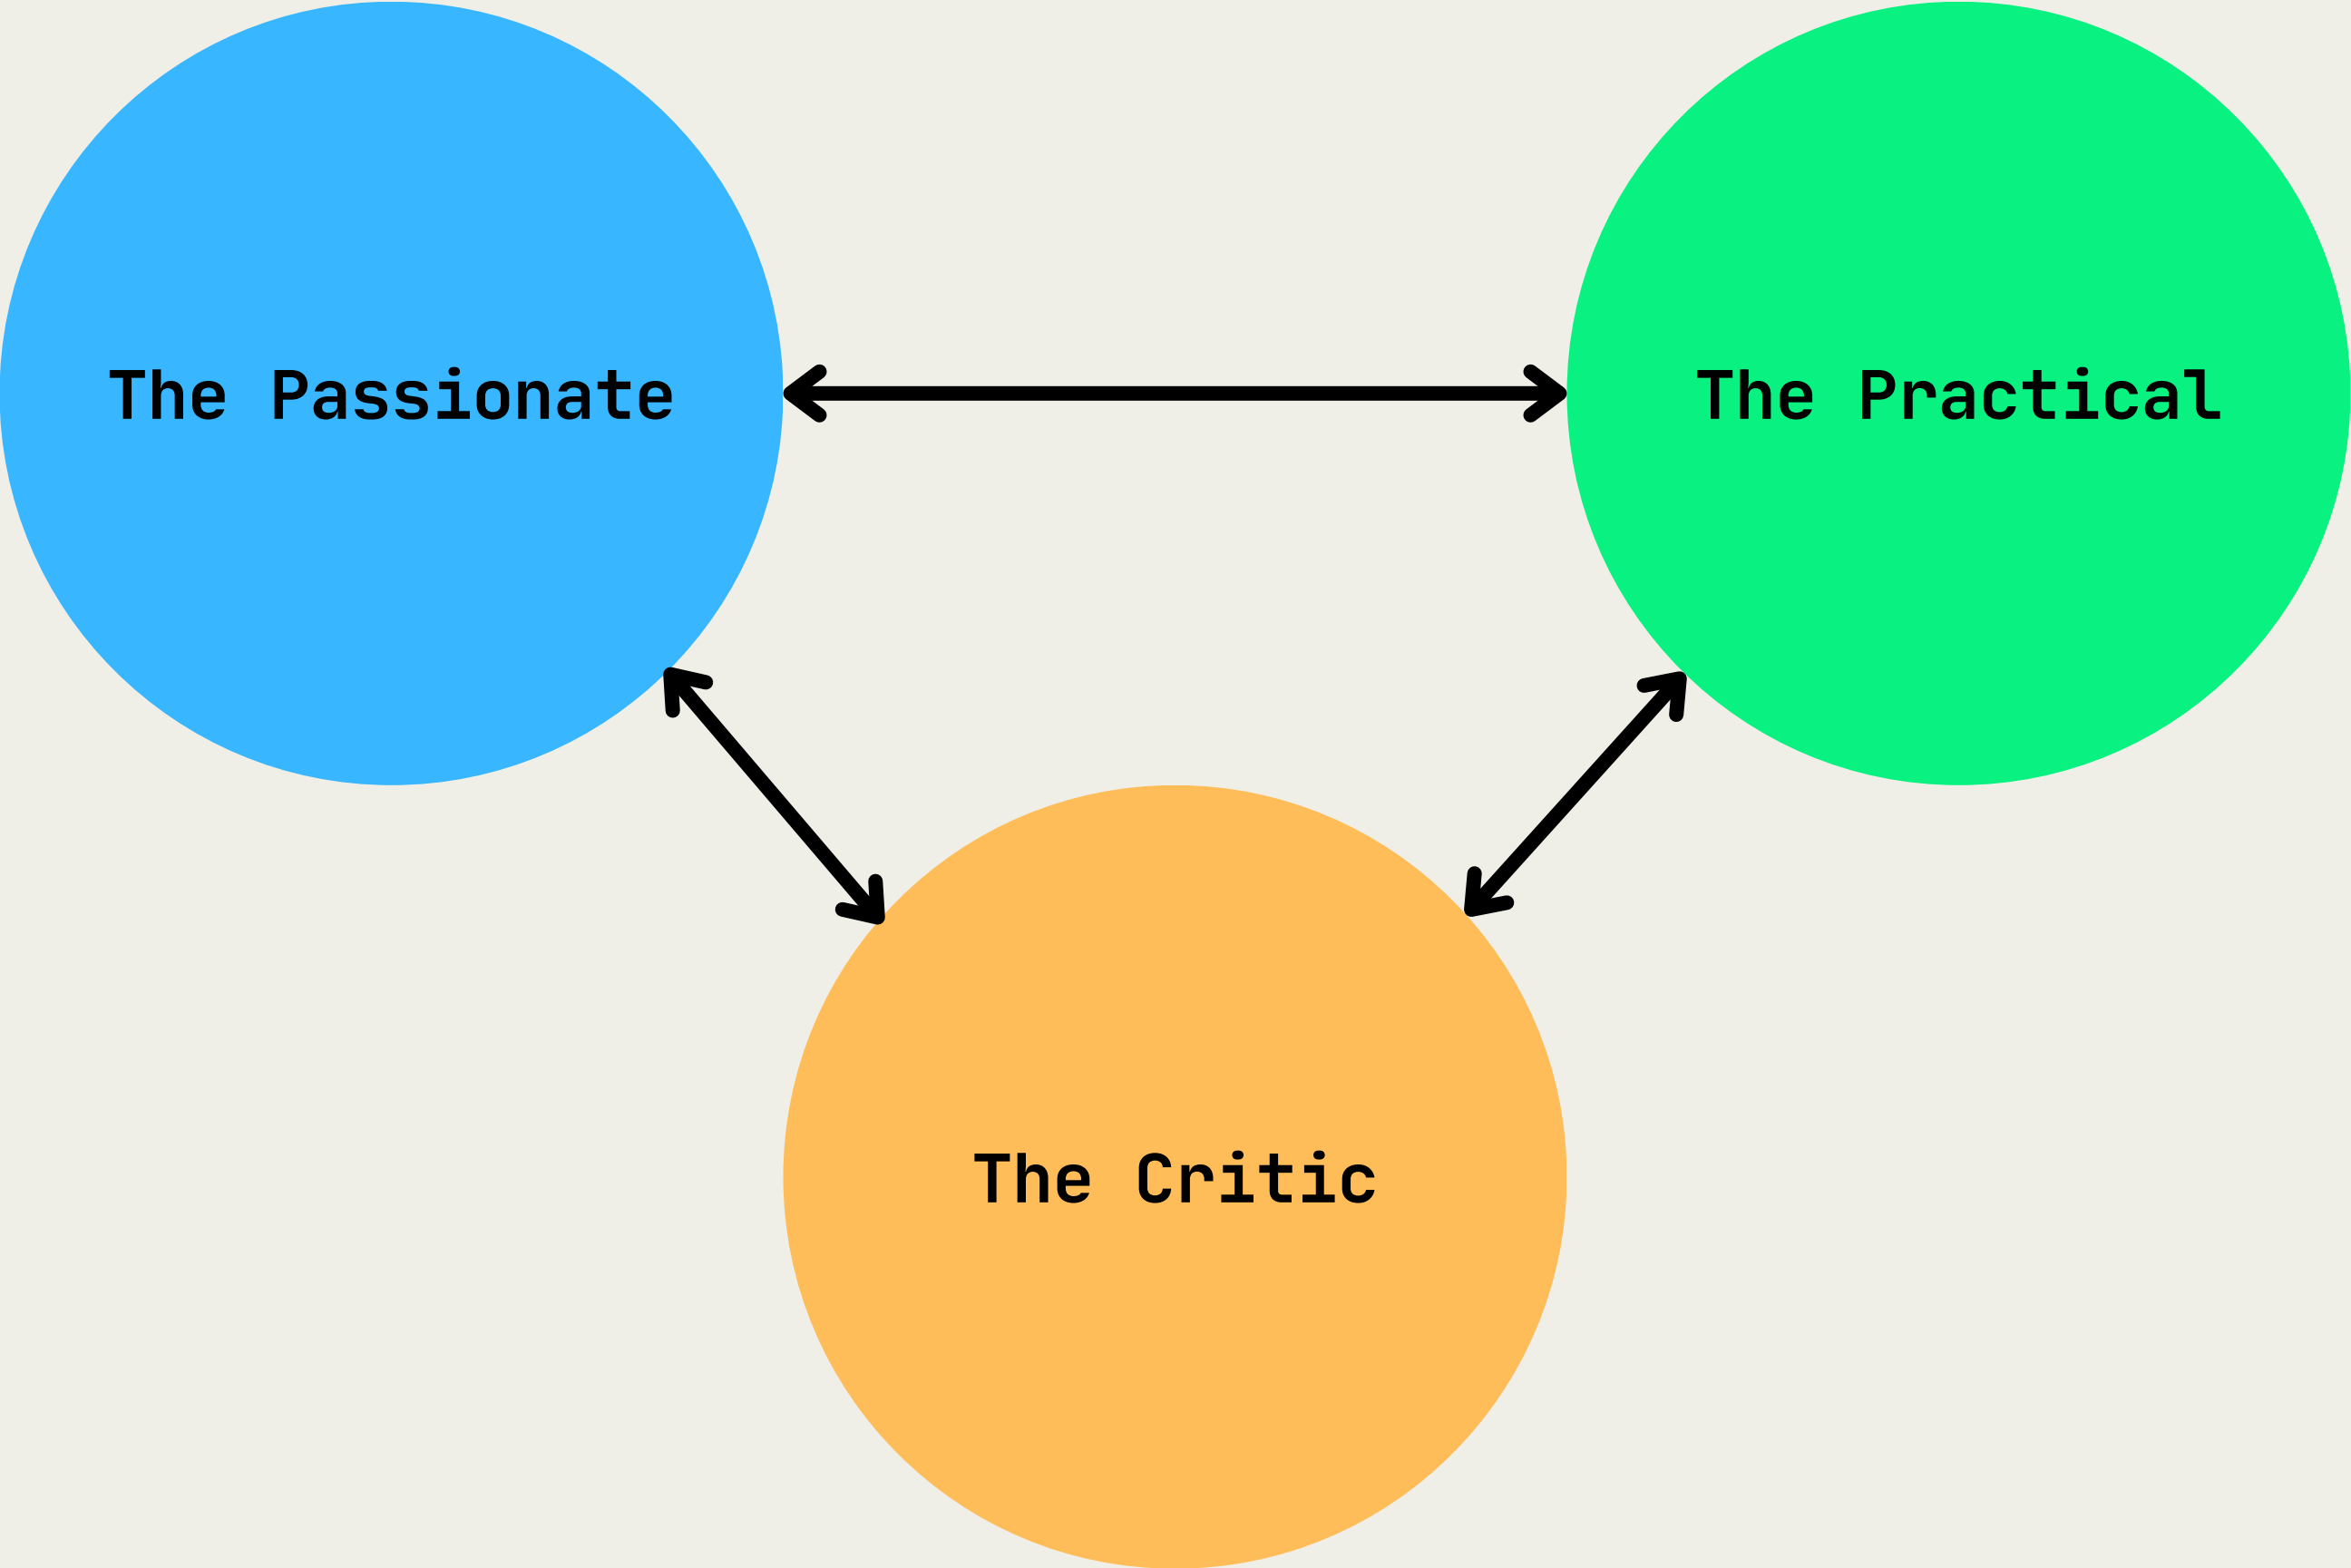

ENGINEERING STRUCTURE

3

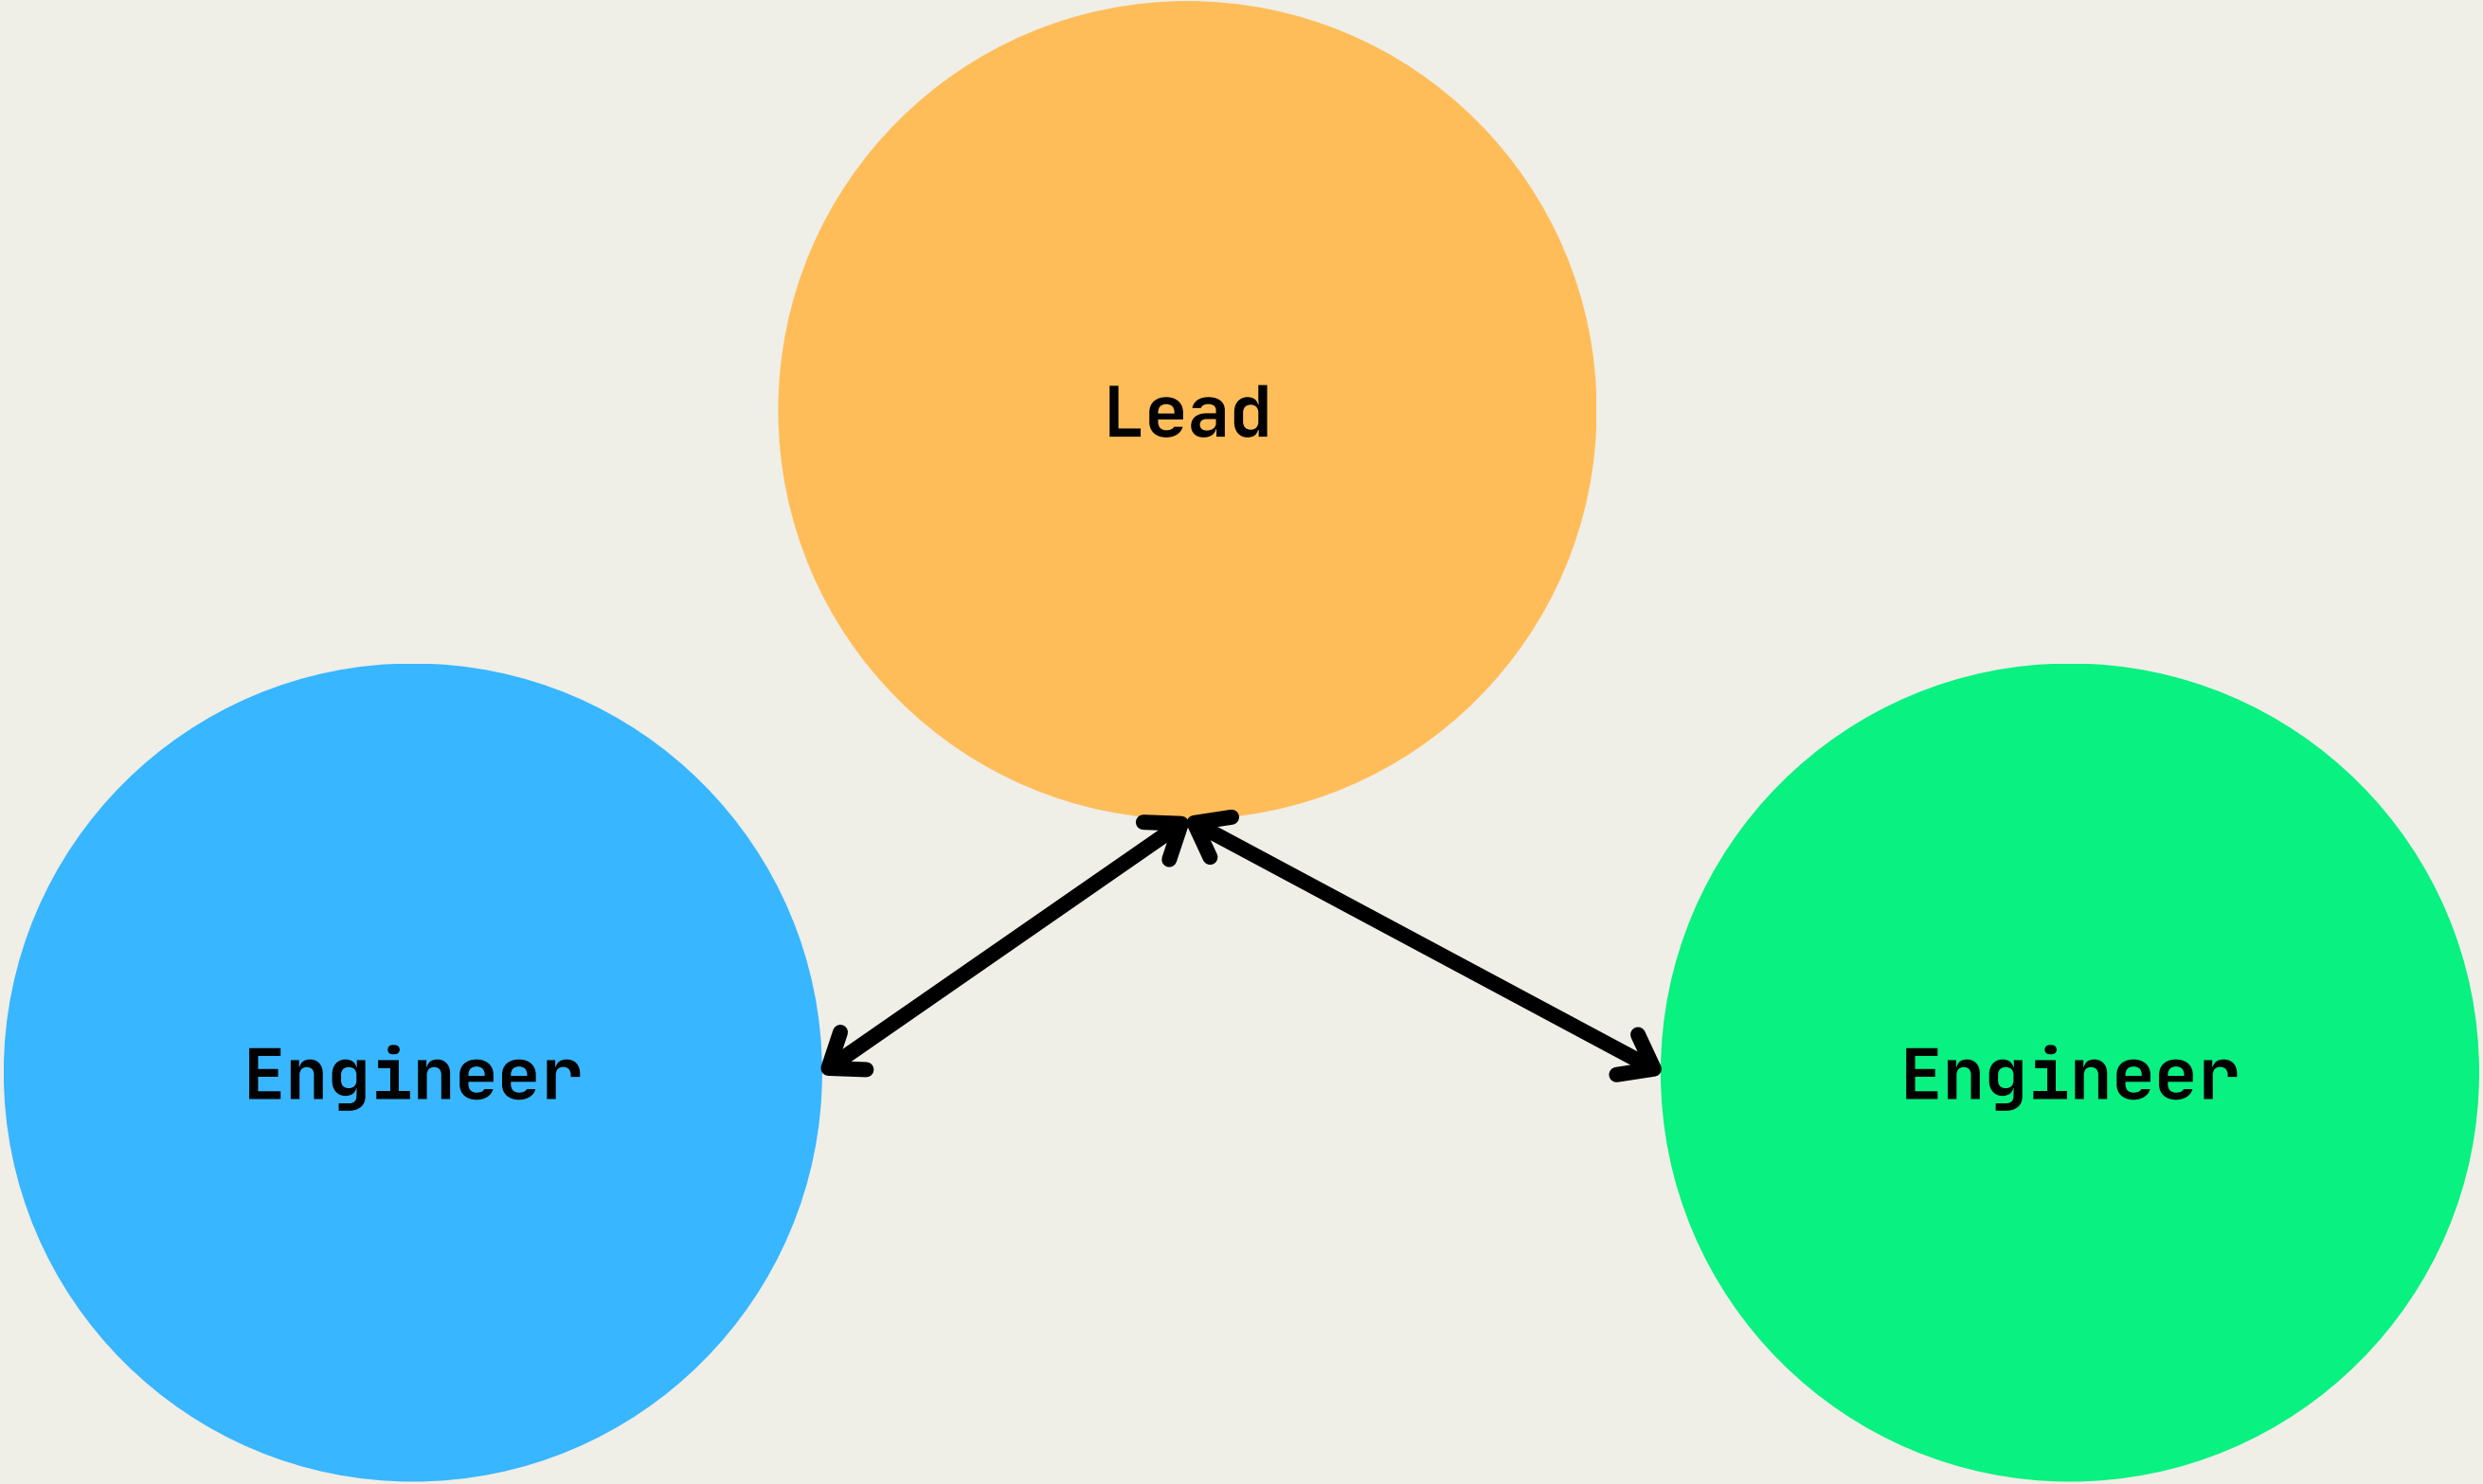

TEAM COMPOSITION

- Build teams that can work asynchronously
- Focus on technical excellence and curiosity
- There should be technical BALANCE
- Cohesion! Cohesion! Cohesion!

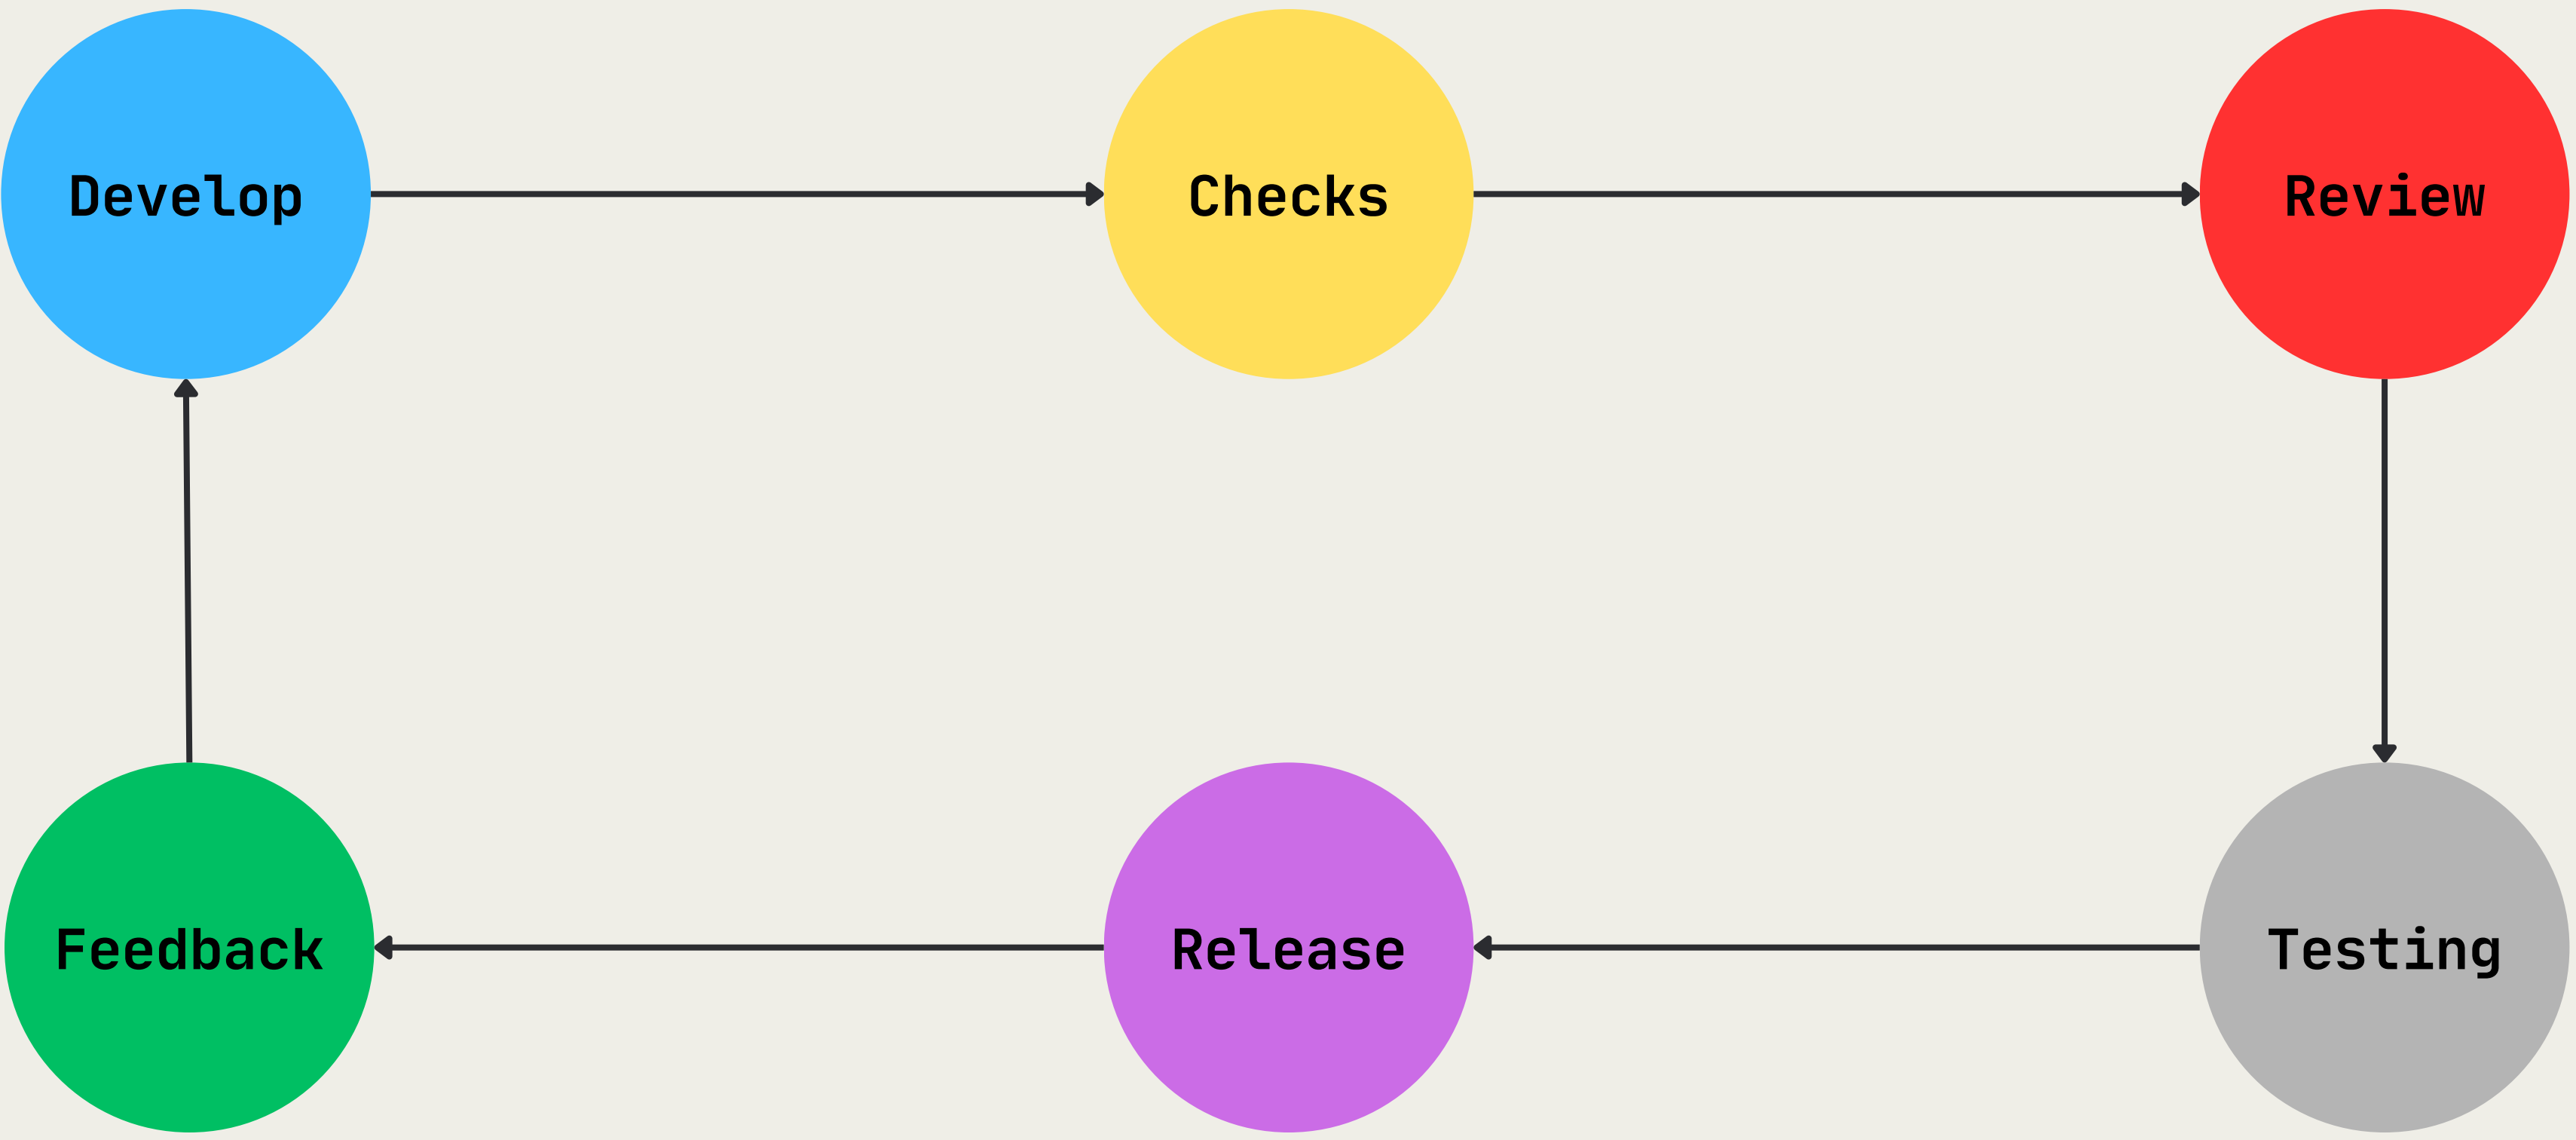

TEAM BALANCE

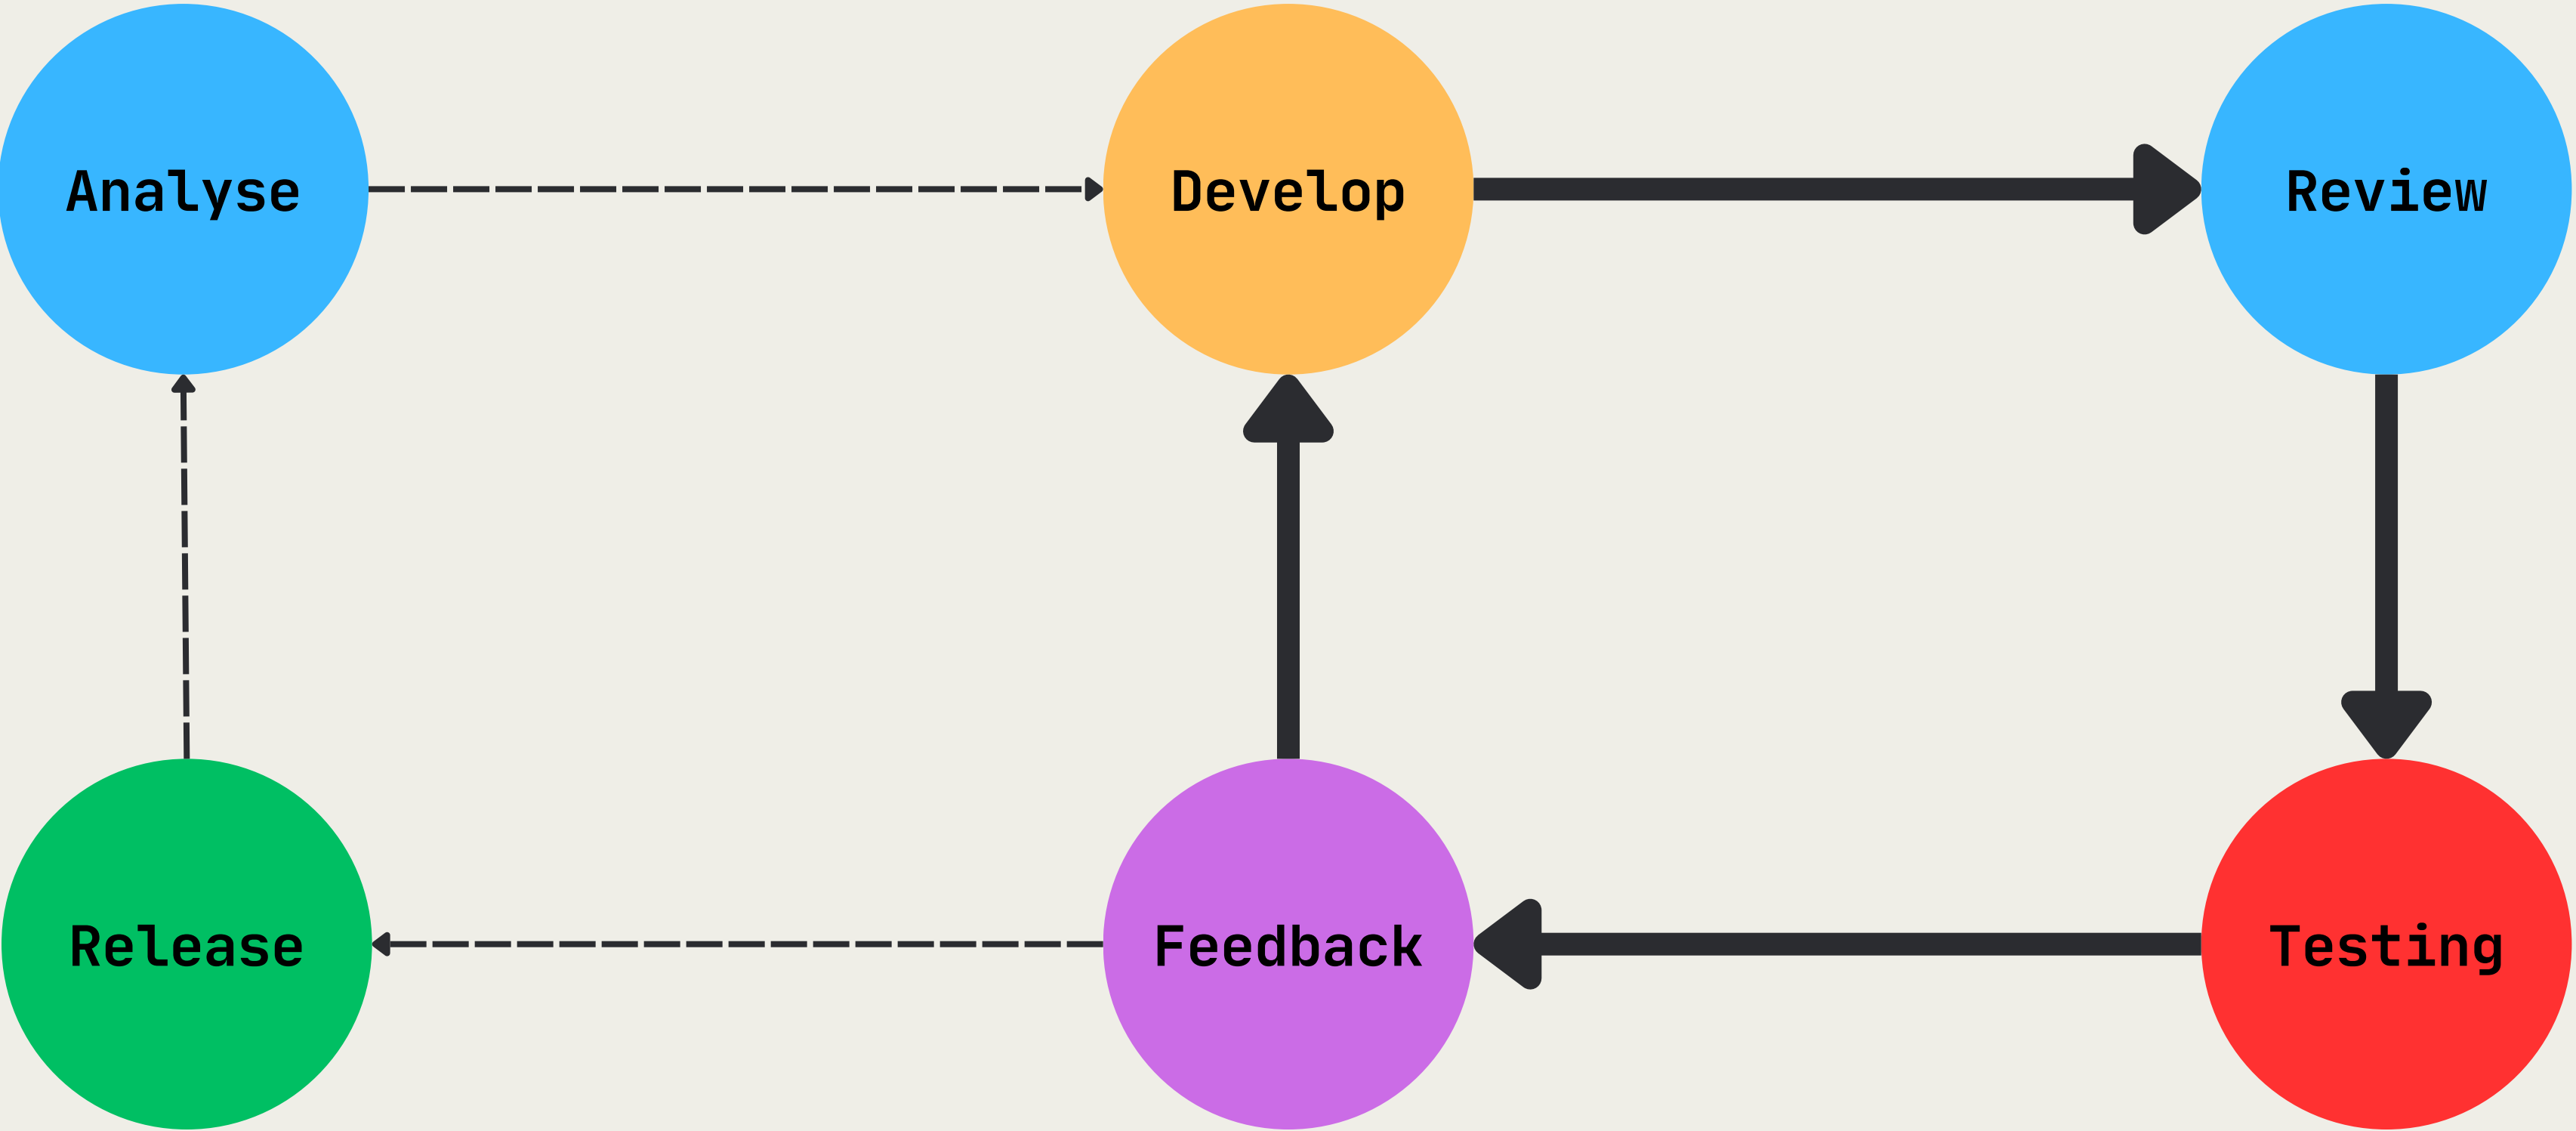

TEAM DISTRIBUTION

NORMAL WORKFLOW

FEEDBACK LOOP WORKFLOW

**BUILD WITH
USERS**

WHY, BUILD WITH USERS?

They're the ones who are using the product

Don't waste time on features they don't need

Boost engagement

Pre-emptive feature delivery

CATEGORIZATION AT THAMANI

JUST USE FREE STUFF

Review : Github & Github Workflow (1 develops, 2 review)

Testing : Firebase App Distribution

Feedback : Posthog, Canny & Feedbackbase

Development : Any IDE of your choice

KEY TAKEAWAYS

Balance Velocity & User Value

Build a culture of being user centric, practical & experimental

Build Fast & Iterate on Feedback

Engage users earlier than release
